STATUS/CATEGORIZATION &amp; DATE/DAYS SINCE

# Requests Filled

### Interactive Map of Needs

- Needs are displayed as Circles
- Needs are "Featured" in "Carousel" fashion in the box to right labelled "What We Need"
- Needs are cycled through based on a certain criteria (Latest, Most Critical, etc)
- Each circle is hex #C0C0C0, until it is "Featured"
- Each need is Featured for one second
- When Featured, its corresponding Circle on the Map turns a color matching the category (Green for Food, Blue for Water, Red for Medicine, etc.)
- Featured-Carousel timing can be overridden by User selecting a Requests for (essentially a Sort By filter)
- When Filter is selected, the WHAT WE NEED Box also pauses in the display, waiting for a Need Circle to be selected
- Each Need Circle can correspond to a single request or an aggregate summation. In which instance, the circle's size is representative of the amount needed.
